

## Process of Looking at Data

### 1. Getting ready, prepared

Get organized for \_\_\_\_\_ work.

Decide what \_\_\_\_\_ you are going to look at.

Make sure you know \_\_\_\_\_ to look at data.

### 2. Inquire

What \_\_\_\_\_ do we want to ask?

What data would we look at to \_\_\_\_\_ the \_\_\_\_\_ which lead to more \_\_\_\_\_?

What is the learner's \_\_\_\_\_ we want to focus on?

Now, what have we \_\_\_\_\_? Are we making \_\_\_\_\_ or not?

### 3. Act

What are we going to do about the \_\_\_\_\_?

What are the possible \_\_\_\_\_?

Write down a \_\_\_\_\_.

How will we know if we're \_\_\_\_\_?
